

## What is Revive?

Revive is a natural organic based soil treatment and wetting agent that is designed to help grow a thick lush lawn. Revive will improve water penetration and root activity, breaks up and loosens hard soils, reduces watering requirements and helps eliminate dry spots.

We recommend treating your lawn with Revive in the spring to help green your lawn up, in July when temperatures are at their peak and again in the fall so that your lawn is at its best before it goes in to dormancy.

Call us at 303-868-3164 if you are interested in having your lawn treated or evaluated.
